PROFESSIONAL SUMMARY

AI/ML engineering student (B.Tech, 2027) who builds AI products end to end: a health-risk monitoring engine, a defect-detection platform, a retail recommender on 1M+ transactions, a crop-prediction API, and a Gemini multi-agent research assistant (in progress). I train models, serve them through FastAPI, and add automated tests.

EDUCATION

B.Tech – Computer Science & Engineering (AI & ML Specialization) · Expected Graduation: 2027
Kallam Haranadhareddy Institute of Technology, Guntur, Andhra Pradesh · CGPA: 7.57/10 (up to VI Semester)

TECHNICAL SKILLS

Languages: Python, SQL
Machine Learning: Scikit-learn, Classification, Clustering, Data Preprocessing, Feature Engineering, Model Evaluation, Model Deployment
Deep Learning & Computer Vision: Deep Learning, CNN, TensorFlow, Keras, MobileNetV2, YOLOv8, OpenCV
Generative AI: Gemini API (LLMs), Multi-Agent Orchestration
Backend & Web: FastAPI, REST APIs, JWT, SQLAlchemy, React, TypeScript
Data & Databases: Pandas, NumPy, Matplotlib, Power BI, DAX · PostgreSQL, SQLite
Tools: Git, GitHub, GitHub Actions, Jupyter Notebook, Google Colab

PROFESSIONAL EXPERIENCE

AI/ML Intern · Zaalima Development Pvt. Ltd. · Remote · Oct 2026 – Present
Project: Autonomous Multimodal Scientific Discovery Agent (in progress, Team Lead, team of 3) | GitHub
- Lead a 3-member team, setting up the repository, branch workflow, and task split across agents, paper ingestion, and retrieval.
- Built a Gemini API service, 3 agents (Literature Reviewer, Hypothesis Generator, Code Executor), and an orchestrator, with GitHub Actions CI (mocked and live API tests passing).

AI Intern · PrimeVector (Nidvex Technology Pvt. Ltd.) · Remote · Aug 2026 – Sep 2026
Project: RetailIQ – Retail Product Recommendation & Customer Behavior Analysis | GitHub
- Cleaned 1M+ retail transactions, built an item-item collaborative filtering recommender, and segmented 5,800+ customers with K-Means on RFM features.
- Trained a Logistic Regression model for 30-day repurchase prediction (ROC-AUC 0.78); built the FastAPI backend (JWT) and React dashboard.

AI/ML Intern · SmartBridge Educational Services · Remote · Jun 2026 – Jul 2026
Project: OptiCrop – Smart Agricultural Production Optimization Engine | GitHub
- Trained and compared Random Forest, Decision Tree, KNN, and Logistic Regression on 2,200 records (22 crops); the best model (Random Forest) reached 99.55% test accuracy and powers top-3 crop recommendations with confidence scores.
- Built a FastAPI backend (14 endpoints, JWT, admin and farmer roles) and integrated the Gemini API for leaf disease detection.

Data Analyst Intern · Bluestock Fintech · Remote · Apr 2026 – May 2026
Projects: Nifty 100 Financial Intelligence Dashboard · All India Villages Data Analytics | Demo
- Cleaned and validated financial data with Python, PostgreSQL, and SQL; built a Power BI dashboard for all 100 Nifty 100 companies (4 DAX measures, KPI cards, drill-throughs).
- Designed a normalized, indexed PostgreSQL database of 41.3 lakh (41,33,956) village demographic records, with Python ETL and SQL reports.

PROJECTS

1. **FAME-GENIX – AI-Powered Smart Health Monitoring & Emergency Response System** · Jynex Skyline × Bharat Cultural Society Hackathon (Aug 2026) · Solo project | GitHub
Python · FastAPI · React · TypeScript · Scikit-learn · Gemini API
- Engineered a risk engine combining Logistic Regression (96% accuracy, 400 synthetic samples), Z-score anomaly detection, and EWMA drift detection (40/30/30 fusion), plus 11 rule-based red-flag checks.
- Built a full-stack platform (40+ REST endpoints, 5 role-based portals, JWT/RBAC, 23 automated tests) with Gemini health chat, PDF lab-report analysis, and a rule-based fallback.

2. **OptiVision – AI Quality Control System** · Final-Year Project (2026) | GitHub
Python · TensorFlow · Keras · MobileNetV2 · YOLOv8 · OpenCV · FastAPI · React
- Collected image datasets and trained MobileNetV2 defect classifiers for 5 product categories, reaching 91–97% test accuracy per category (70/15/15 split).
- Integrated pretrained YOLOv8n and built a FastAPI backend (31 endpoints, JWT, ~35 ms inference) with live camera detection and a React dashboard with PDF/JSON report export.

CERTIFICATIONS

IBM AI/ML (IBM SkillsBuild, Mar 2025) · AWS AI/ML (AWS Training, Apr 2025) · Generative AI (Simplilearn, Apr 2025) · Foundational Course on Applied ML and AI (CII, Jun 2026)
