Data Analyst with internship experience at Bluestock Fintech. Skilled in transforming raw data into actionable insights through SQL, Python, and PostgreSQL analytics. Experienced in building Power BI dashboards with DAX, KPIs, and drill-through reports for financial data storytelling and business decision-making.

TECHNICAL SKILLS

Languages: Python · SQL
Databases: PostgreSQL · MySQL
Analytics: Data Cleaning · Data Transformation · EDA · ETL · Data Validation · Data Modeling · Statistical Analysis
BI & Visualization: Power BI · DAX · Tableau · Excel · Dashboard Development · KPI Reporting · Business Intelligence · Financial Analytics
Libraries: Pandas · NumPy · Matplotlib · Seaborn
Tools: Git · Jupyter Notebook · Google Colab · VS Code

EXPERIENCE

Data Analyst Intern · Bluestock Fintech · Remote · Apr 2026 -- May 2026

- Cleaned, transformed, and validated structured financial datasets using Python and PostgreSQL for analytics-ready reporting.
- SQL queries with JOINs, GROUP BY, subqueries, and aggregates to extract business insights from relational databases.
- Built Power BI dashboards with 4 DAX measures, KPI cards, slicers, and drill-throughs to analyze company financials, profitability, and ROE.
- Delivered two capstone projects covering database analytics, financial BI dashboards, and executive reporting.

Data Analytics Job Simulation · Deloitte Australia (Forage) · Virtual · Mar 2026

- Analyzed IoT telemetry data to identify machine failure trends across manufacturing sites.
- Built Tableau dashboards and used Excel to assess gender pay equality and communicate business findings.

PROJECTS

1. **Nifty 100 Financial Intelligence Dashboard**

Power BI · DAX · PostgreSQL · SQL · Python

- Integrated multi-table PostgreSQL financial datasets (P&L, balance sheet, cash flow) into Power BI for unified reporting.
- Developed 4 DAX measures -- Net Profit, ROE, Profit Margin, Debt Ratio -- and designed KPI cards, slicers, and drill-through pages.
- Enabled executive-level financial performance monitoring, trend analysis, and company benchmarking across Nifty 100 companies.

2. **ALL India Villages Data Analytics API**

Python · PostgreSQL · SQL · ETL · Data Modeling

- Designed a PostgreSQL relational database with schema, indexing, and normalization for 4.13M+ lakh villages demographic data management.
- Developed Complex SQL queries (JOINs, HAVING, subqueries, CASE) to generate India - level analytical reports.
- Automated database connectivity and ETL workflows using Python to ensure clean, analytics-ready data pipelines.

3. **BI Dashboard Portfolio**

Power BI · DAX · Tableau · Excel

- Built commodity price, retail sales (D-Mart), and entertainment analytics dashboards with KPIs, time-series, and YoY growth metrics.

EDUCATION

B.Tech - CSE (AI & ML Specialization) · Kallam Haranadhareddy Institute of Technology, Guntur, AP · Expected 2027
CGPA: 7.57/10 (up to VI Semester) · Relevant: Data Analytics, DBMS, Python, Statistics, DSA

CERTIFICATIONS

Data Analyst Internship -- Bluestock Fintech · Data Analytics Essentials -- Cisco Networking Academy · SmartBridge AI/ML Internship
